- Cloud & Backend: Firebase Authentication, Firestore, REST APIs
- Version Control: Git, GitHub
- Other Tools: Android Studio, Postman, Figma (UI/UX Design)

LANGUAGES

- English (Fluent)
- Hindi(Fluent)

PROFILE

I am a passionate Android Developer with experience in developing high-performance mobile applications. I specialize in Kotlin, Jetpack Compose, Firebase, and Room Database. My goal is to build efficient, user-friendly apps with seamless integrations. I am a problem-solver who enjoys crafting innovative mobile solutions.

EXPERIENCE & PROJECTS

Dating App

- Built a dating app with real-time chat and video call functionality using Jetpack Compose and Zego.
- Implemented Firebase Authentication for secure login

📞 Phone Contact Management System

- Developed an app using Room DB to manage contacts with search, edit, and delete features.

Multi-Functional App

- Developed a multifunctional app featuring a simple Notepad using Jetpack Compose and Room DB, a Weather forecasting tool with OpenWeather API, a quick BMI Calculator, and an engaging Date Converter & Love Calculator widget with intuitive UI/UX."

EDUCATION

🎓 **B.Tech in Computer Science & Engineering (General)**   2023-2027

Jain (Deemed-to-be University) | Expected Graduation: 2027

CGPA-9+
